DETAILED ACTION

Double Patenting

~~Claims 1-11 are rejected under the judicially created doctrine of double patenting~~
over claims 1 and 2 of U. S. Patent No. 6,351,923 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: a spacer frame including an elongate tubular member, first and second glass members, and upper and lower webs, a yieldable material and a vertical gap.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent.
